TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 186

Acetylcholinesterase; Rat; Peripheral tissues; Automated analysis; Homogenization; Solubilization; Iso-OMPA; Ellman **186**, 241

Adrenergic receptors; 1,2-Dibromoethane; Phenylephrine; Phentolamine **186**, 181

Aflatoxin; Mycotoxicose; Mycotoxins; Fumonisin; Immunomodulation **186**, 159

Anxiety; Lead; Cadmium; Hippocampus; Hypothalamus; Monoamines; Plus-maze **186**, 125

Apoptosis; Violacein; HL60 cells; β-Cyclodextrin; Inclusion complex; Differentiation **186**, 217

Arsenic; Selenite; Biliary excretion; Urinary excretion; Methylation; Periodate-oxidised adenosine **186**, 33

Automated analysis; Acetylcholinesterase; Rat; Peripheral tissues; Homogenization; Solubilization; Iso-OMPA; Ellman **186**, 241

Bacillus thuringiensis; Thuringiensin; Pulmonary toxicity; Hydroxyproline; Fibronectin **186**, 205

Biliary excretion; Arsenic; Selenite; Urinary excretion; Methylation; Periodate-oxidised adenosine **186**, 33

Bioactive/immunoreactive ratio (*B*/*I* ratio); 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin (TCDD); Chorionic gonadotrophin (CG); Bioassay **186**, 21

Bioassay; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin (TCDD); Chorionic gonadotrophin (CG); Bioactive/immunoreactive ratio (*B*/*I* ratio) **186**, 21

Cadmium; Lead; Hippocampus; Hypothalamus; Monoamines; Anxiety; Plus-maze **186**, 125

Cadmium; Minerals; Human breast milk **186**, 255

Cadmium; Zinc; Sex hormone; Metallothionein; Rat prostate **186**, 109

Caffeine metabolism; Protocatechuic acid; Ellagic acid; Tannic acid; *o*-Toluidine; Cytochrome P450 **186**, 67

Carbon monoxide; Leukoencephalopathy; Lignocaine; Lidocaine **186**, 143

β-catenin; Sea urchin embryo; Exogastrulation; Developmental toxicity; Creosote; Polycyclic aromatic hydrocarbon **186**, 93

Cell culture; Endocytosis; Trichosanthin; Receptor-mediated; Choriocarcinoma; Confocal microscopy; Transmission electron microscopy; Hepatoma; FITC; Gold particles **186**, 191

Cerebellum; Drinking water; Muscle; Silver; Water disinfection **186**, 151

Choriocarcinoma; Endocytosis; Trichosanthin; Receptor-mediated; Confocal microscopy; Transmission electron microscopy; Hepatoma; FITC; Gold particles; Cell culture **186**, 191

Chorionic gonadotrophin (CG); 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin (TCDD); Bioactive/immunoreactive ratio (*B*/*I* ratio); Bioassay **186**, 21

Comet assay; Styrene; Genetic polymorphisms; Cytochrome P450; Epoxide hydrolase; Glutathione *S*-transferase **186**, 131

Complement 3a receptor; Mycotoxin; Trichothecene; Vomitoxin; Immunotoxicology; Macrophage inflammatory protein-2; Differential display; Satratoxin G; Stachybotrys **186**, 51

Confocal microscopy; Endocytosis; Trichosanthin; Receptor-mediated; Choriocarcinoma; Transmission electron microscopy; Hepatoma; FITC; Gold particles; Cell culture **186**, 191

Creosote; β-catenin; Sea urchin embryo; Exogastrulation; Developmental toxicity; Polycyclic aromatic hydrocarbon **186**, 93

β-Cyclodextrin; Violacein; HL60 cells; Inclusion complex; Differentiation; Apoptosis **186**, 217

PII: S0300-483X(03)00075-1

Cytochrome P450; Protocatechuic acid; Ellagic acid; Tannic acid; *o*-Toluidine; Caffeine metabolism **186**, 67

Cytochrome P450; Styrene; Comet assay; Genetic polymorphisms; Epoxide hydrolase; Glutathione *S*-transferase **186**, 131

Developmental toxicity; β-catenin; Sea urchin embryo; Exogastrulation; Creosote; Polycyclic aromatic hydrocarbon **186**, 93

1,2-Dibromoethane; Phenylephrine; Phentolamine; Adrenergic receptors **186**, 181

3-(3,5-Dichlorophenyl)-2,4-imidazolidinedione; Nephrotoxicity; Hepatotoxicity; *N*-(3,5-Dichlorophenyl)succinimide; 3-(3,5-Dichlorophenyl)-2,4-oxazolidinedione; 3-(3,5-Dichlorophenyl)-1-methyl-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-thiazolidinedione **186**, 79

3-(3,5-Dichlorophenyl)-1-methyl-2,4-imidazolidinedione; Nephrotoxicity; Hepatotoxicity; *N*-(3,5-Dichlorophenyl)succinimide; 3-(3,5-Dichlorophenyl)-2,4-oxazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-thiazolidinedione **186**, 79

3-(3,5-Dichlorophenyl)-2,4-oxazolidinedione; Nephrotoxicity; Hepatotoxicity; *N*-(3,5-Dichlorophenyl)succinimide; 3-(3,5-Dichlorophenyl)-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-1-methyl-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-thiazolidinedione **186**, 79

3-(3,5-Dichlorophenyl)-2,4-thiazolidinedione; Nephrotoxicity; Hepatotoxicity; *N*-(3,5-Dichlorophenyl)succinimide; 3-(3,5-Dichlorophenyl)-2,4-oxazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-1-methyl-2,4-imidazolidinedione **186**, 79

Differential display; Mycotoxin; Trichothecene; Vomitoxin; Immunotoxicology; Macrophage inflammatory protein-2; Complement 3a receptor; Satratoxin G; Stachybotrys **186**, 51

Differentiation; Violacein; HL60 cells; β-Cyclodextrin; Inclusion complex; Apoptosis **186**, 217

***d*-Phenothrin**; Endocrine disruptor; Pyrethroid; Sumithrin; Uterotrophic assay; Hershberger assay **186**, 227

Drinking water; Cerebellum; Muscle; Silver; Water disinfection **186**, 151

Ellagic acid; Protocatechuic acid; Tannic acid; *o*-Toluidine; Cytochrome P450; Caffeine metabolism **186**, 67

Ellman; Acetylcholinesterase; Rat; Peripheral tissues; Automated analysis; Homogenization; Solubilization; Iso-OMPA **186**, 241

Endocrine disruptor; Pyrethroid; *d*-Phenothrin; Sumithrin; Uterotrophic assay; Hershberger assay **186**, 227

Endocytosis; Trichosanthin; Receptor-mediated; Choriocarcinoma; Confocal microscopy; Transmission electron microscopy; Hepatoma; FITC; Gold particles; Cell culture **186**, 191

Epoxide hydrolase; Styrene; Comet assay; Genetic polymorphisms; Cytochrome P450; Glutathione *S*-transferase **186**, 131

EROD; PCB 118; Low dose; Perinatal exposure; Toxic equivalency factor; Thyroid **186**, 11

Exogastrulation; β-catenin; Sea urchin embryo; Developmental toxicity; Creosote; Polycyclic aromatic hydrocarbon **186**, 93

Fibronectin; Thuringiensin; Pulmonary toxicity; Hydroxyproline; *Bacillus thuringiensis* **186**, 205

FITC; Endocytosis; Trichosanthin; Receptor-mediated; Choriocarcinoma; Confocal microscopy; Transmission electron microscopy; Hepatoma; Gold particles; Cell culture **186**, 191

Fumonisin; Mycotoxicose; Mycotoxins; Aflatoxin; Immunomodulation **186**, 159

Genetic polymorphisms; Styrene; Comet assay; Cytochrome P450; Epoxide hydrolase; Glutathione *S*-transferase **186**, 131

Glutathione *S*-transferase; Styrene; Comet assay; Genetic polymorphisms; Cytochrome P450; Epoxide hydrolase **186**, 131

Gold particles; Endocytosis; Trichosanthin; Receptor-mediated; Choriocarcinoma; Confocal microscopy; Transmission electron microscopy; Hepatoma; FITC; Cell culture **186**, 191

Heavy metals; Yellow-necked mice; Histopathology **186**, 1

Hepatoma; Endocytosis; Trichosanthin; Receptor-mediated; Choriocarcinoma; Confocal microscopy; Transmission electron microscopy; FITC; Gold particles; Cell culture **186**, 191

Hepatotoxicity; Nephrotoxicity; *N*-(3,5-Dichlorophenyl) succinimide; 3-(3,5-Dichlorophenyl)-2,4-oxazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-1-methyl-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-thiazolidinedione **186**, 79

Hershberger assay; Endocrine disruptor; Pyrethroid; *d*-Phenothrin; Sumithrin; Uterotrophic assay **186**, 227

Hippocampus; Lead; Cadmium; Hypothalamus; Monoamines; Anxiety; Plus-maze **186**, 125

Histopathology; Yellow-necked mice; Heavy metals **186**, 1

HL60 cells; Violacein; β-Cyclodextrin; Inclusion complex; Differentiation; Apoptosis **186**, 217

Homogenization; Acetylcholinestcrase; Rat; Peripheral tissues; Automated analysis; Solubilization; Iso-OMPA; Ellman **186**, 241

Human breast milk; Cadmium; Minerals **186**, 255

Hydroxyproline; Thuringiensin; Pulmonary toxicity; Fibronectin; *Bacillus thuringiensis* **186**, 205

Hypothalamus; Lead; Cadmium; Hippocampus; Monoamines; Anxiety; Plus-maze **186**, 125

Immunomodulation; Mycotoxicose; Mycotoxins; Fumonisin; Aflatoxin **186**, 159

Immunotoxicology; Mycotoxin; Trichothecene; Vomitoxin; Macrophage inflammatory protein-2; Complement 3a receptor; Differential display; Satratoxin G; Stachybotrys **186**, 51

Inclusion complex; Violacein; HL60 cells; β-Cyclodextrin; Differentiation; Apoptosis **186**, 217

Iso-OMPA; Acetylcholinestcrase; Rat; Peripheral tissues; Automated analysis; Homogenization; Solubilization; Ellman **186**, 241

LD_{50}; Ricin; Ricinus agglutinin; Toxicity **186**, 119

Lead; Cadmium; Hippocampus; Hypothalamus; Monoamines; Anxiety; Plus-maze **186**, 125

Leukoencephalopathy; Carbon monoxide; Lignocaine; Lidocaine **186**, 143

Lidocaine; Carbon monoxide; Leukoencephalopathy; Lignocaine **186**, 143

Lignocaine; Carbon monoxide; Leukoencephalopathy; Lidocaine **186**, 143

Low dose; PCB 118; Perinatal exposure; Toxic equivalency factor; Thyroid; EROD **186**, 11

Macrophage inflammatory protein-2; Mycotoxin; Trichothecene; Vomitoxin; Immunotoxicology; Complement 3a receptor; Differential display; Satratoxin G; Stachybotrys **186**, 51

Metallothioncin; Cadmium; Zinc; Sex hormone; Rat prostate **186**, 109

Methylation; Arsenic; Selenite; Biliary excretion; Urinary excretion; Periodate-oxidised adenosine **186**, 33

Minerals; Cadmium; Human breast milk **186**, 255

Monoamines; Lead; Cadmium; Hippocampus; Hypothalamus; Anxiety; Plus-maze **186**, 125

Muscle; Cerebellum; Drinking water; Silver; Water disinfection **186**, 151

Mycotoxicose; Mycotoxins; Fumonisin; Aflatoxin; Immunomodulation **186**, 159

Mycotoxins; Mycotoxicose; Fumonisin; Aflatoxin; Immunomodulation **186**, 159

Mycotoxin; Trichothecene; Vomitoxin; Immunotoxicology; Macrophage inflammatory protein-2; Complement 3a receptor; Differential display; Satratoxin G; Stachybotrys **186**, 51

***N*-(3,5-Dichlorophenyl)succinimide**; Nephrotoxicity; Hepatotoxicity; 3-(3,5-Dichlorophenyl)-2,4-oxazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-1-methyl-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-thiazolidinedione **186**, 79

Nephrotoxicity; Hepatotoxicity; *N*-(3,5-Dichlorophenyl) succinimide; 3-(3,5-Dichlorophenyl)-2,4-oxazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-1-methyl-2,4-imidazolidinedione; 3-(3,5-Dichlorophenyl)-2,4-thiazolidinedione **186**, 79

***o*-Toluidine**; Protocatechuic acid; Ellagic acid; Tannic acid; Cytochrome P450; Caffeine metabolism **186**, 67

PCB 118; Low dose; Perinatal exposure; Toxic equivalency factor; Thyroid; EROD **186**, 11

Perinatal exposure; PCB 118; Low dose; Toxic equivalency factor; Thyroid; EROD **186**, 11

Periodate-oxidised adenosine; Arsenic; Selenite; Biliary excretion; Urinary excretion; Methylation **186**, 33

Peripheral tissues; Acetylcholinestcrase; Rat; Automated analysis; Homogenization; Solubilization; Iso-OMPA; Ellman **186**, 241

Phentolamine; 1,2-Dibromoethane; Phenylephrine; Adrenergic receptors **186**, 181

Phenylephrine; 1,2-Dibromoethane; Phentolamine; Adrenergic receptors **186**, 181

Plus-maze; Lead; Cadmium; Hippocampus; Hypothalamus; Monoamines; Anxiety **186**, 125

Polycyclic aromatic hydrocarbon; β-catenin; Sea urchin embryo; Exogastrulation; Developmental toxicity; Creosote **186**, 93

Protocatechuic acid; Ellagic acid; Tannic acid; *o*-Toluidine; Cytochrome P450; Caffeine metabolism **186**, 67

Pulmonary toxicity; Thuringiensin; Hydroxyproline; Fibronectin; *Bacillus thuringiensis* **186**, 205

Pyrethroid; Endocrine disruptor; *d*-Phenothrin; Sumithrin; Uterotrophic assay; Hershberger assay **186**, 227

Rat; Acetylcholinesterase; Peripheral tissues; Automated analysis; Homogenization; Solubilization; Iso-OMPA; Ellman **186**, 241

Rat prostate; Cadmium; Zinc; Sex hormone; Metallothionein **186**, 109

Receptor-mediated; Endocytosis; Trichosanthin; Choriocarcinoma; Confocal microscopy; Transmission electron microscopy; Hepatoma; FITC; Gold particles; Cell culture **186**, 191

Ricin; Ricinus agglutinin; LD_{50}; Toxicity **186**, 119

Ricinus agglutinin; Ricin; LD_{50}; Toxicity **186**, 119

Satratoxin G; Mycotoxin; Trichothecene; Vomitoxin; Immunotoxicology; Macrophage inflammatory protein-2; Complement 3a receptor; Differential display; Stachybotrys **186**, 51

Sea urchin embryo; β-catenin; Exogastrulation; Developmental toxicity; Creosote; Polycyclic aromatic hydrocarbon **186**, 93

Selenite; Arsenic; Biliary excretion; Urinary excretion; Methylation; Periodate-oxidised adenosine **186**, 33

Sex hormone; Cadmium; Zinc; Metallothionein; Rat prostate **186**, 109

Silver; Cerebellum; Drinking water; Muscle; Water disinfection **186**, 151
